

Radical reduction in cleaning time and better result

Contract Cleaning

Contract cleaners are involved in a large number of cleaning applications in a multitude of industries involving using various cleaning equipment from manual scraping to using machines. Effective cleaning of customers equipment means extending the life of his production equipment. One of the key factors for a contractor is the time spend on cleaning operations. This is decisive for making a profit or not.

PolarTech dry ice cleaning technology provides significant improvement in your cleaning processes by reducing your overall cleaning time by up to 80 %. Using PolarTech technology gains you access to more than 16 different industries using the same equipment for a large variety of cleaning tasks. This means growing your business and increase your profit. You can take on more jobs with the same amount of staff.

There is no longer need for tedious multiple hours of manual sanding, scraping, scrubbing or using chemicals and solvents. PolarTech dry ice blasting is an environmentally friendly way of cleaning. It is non-toxic, non-conductive, non-abrasive and generates no secondary waste during cleaning operations.

Faster and cleaning in-situ means overall reduction in cleaning time but at the same time resulting in a

better quality of cleaning. The result is a short return on your ROI.

Applications

- *Production lines.*
- *Transport equipment.*
- *General equipment & facility maintenance.*
- *Mould cleaning.*
- *Transportation.*
- *Utilities / power generation.*
- *Disaster remediation (mold, fire, water)*
- *Historical restoration.*
- *Electrical installations*
- *Weld lines*

Customer Benefits

- *Reduce cleaning time.*
- *Eliminate wear & tear.*
- *Non-conductive.*
- *Non abrasive.*
- *Increase operator safety.*
- *No secondary waste.*
- *Cleaning in-situ (no dismantling, no cool down).*
- *Environmentally friendly.*
- *Easy handling and operation.*
