

Faster cleaning without messy clean up...

Mold Remediation

Mold problems is usually created by flooding, plumbing / roof leaks or moist areas that condenses. Mold needs to be addressed as early as possible in order to avoid health hazards or damage to buildings or structures. The traditional methods are very time consuming and very costly. Current ways of removing mold includes sanding, use of detergents / chemicals and wet vacuums. The result is not always satisfactory.

PolarTech dry ice technology provides a solution which is the most effective and fastest way of removing mold spores. Reduction of 70 % in cleaning time and 80 % in general project costs has been obtained by using dry ice blasting. By using PolarTech equipment means you are getting easier access into hard to reach areas where mold can gro.

PolarTech technology is non-toxic and non-conductive so it is far safer and creates less fatigue for the operator. Removing mold can be made by making one pass only. One machine will solve a large range of applications. Dry ice blasting is not creating secondary waste.

The benefits of PolarTech technology ensures a process that is environmentally friendly and gives you a fast payback on your ROI.

Applications

- *General mold remediation.*

Customer Benefits

- *Faster and better cleaning.*
- *No chemicals / solvents.*
- *Completely dry process.*
- *No secondary waste generated.*
- *Access to hard-to-reach areas.*
- *Reduced project costs.*
- *Labor saving.*
- *Safer for operator.*
- *Environmentally friendly.*
- *Fast return on investment.*
